EXPECTED OUTCOME

National
- Enhancing a current Government initiative
- Ensuring universal accessibility and
- Enhancing efficiency of school based adolescent health programme

Local
- Breaking the taboo will help with open discussions about SRHR and communication between the teacher, students, and guardian.
- There will be more public awareness of local schools.

Individual
- Students and educators will gain more knowledge of SRHR, and inadvertently, their friends, families, and neighbors will be benefitted by this.
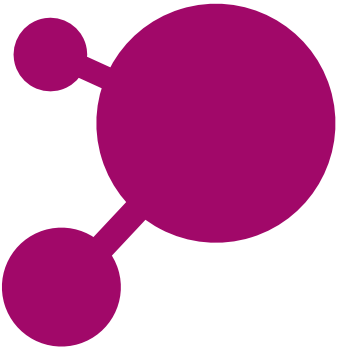

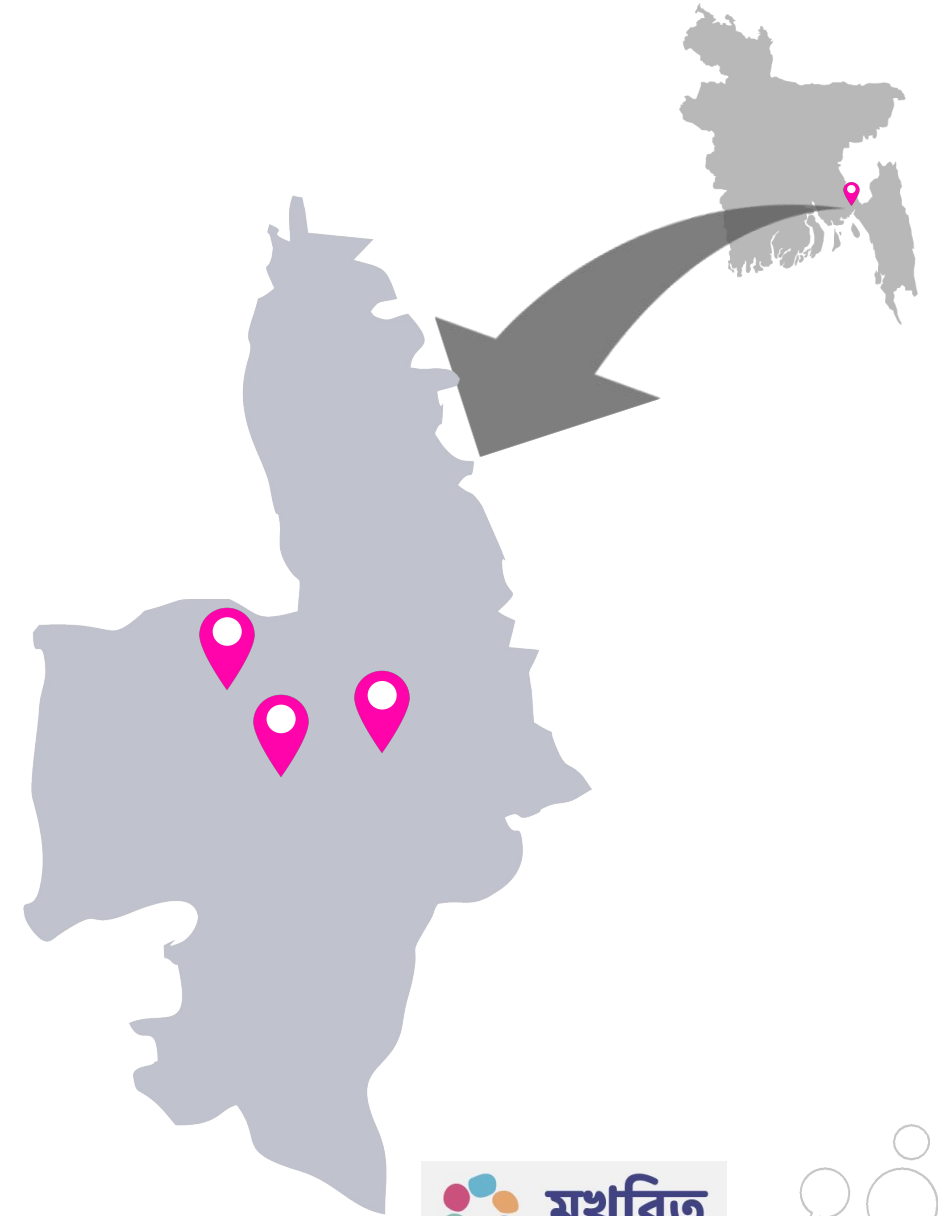

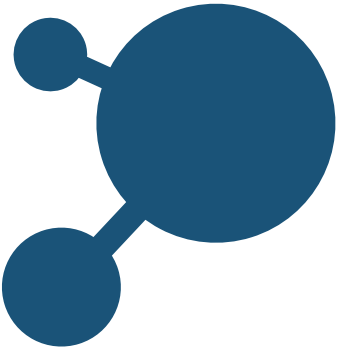

OUTCOME

FENI
